

Summer 2020 Results Process Media Statement

The normal appeals process, when exams and marking have taken place, was unable to happen this year as there were no exam scripts to review or mark.

Working within the VTQ extraordinary regulatory framework provided by Ofqual, we have been able to assign 100% of grades to the candidates submitted by our centres, enabling them to progress to the next stage of their learning or employment, despite the extraordinary circumstances that we have all found ourselves in this year.

The model that we have used to calculate grades is bespoke; it is built to the particular features of the **Level 2 Certificate in Languages for Business**, the only qualification that we have calculated grades for, and is based on the evidence available.

For this reason, it may be different from the model that other awarding organisations have used for their VTQ qualifications.

We are confident that we have applied our chosen model fairly and in accordance with our processes. Where learners believe that we have acted outside of process, they are welcome to make an appeal through their centre.

We are unable to comment on individual cases.
